# Geolocation Checklist for Compliance Managers

- ☐ Are all player locations verified by a trusted third-party provider?
- ☐ Is the accuracy threshold sufficient for border proximity checks?
- ☐ Are spoofing protections (VPN, emulator detection) in place?
- ☐ Can the system block play from disallowed jurisdictions?
- ☐ Are non-compliance events logged and reviewed?
- ☐ Is user consent obtained after presenting location & privacy terms?

Review this checklist quarterly and update it whenever new regulations are implemented. Remember, geolocation compliance is an ongoing operational requirement that demands regular monitoring.

Looking for a geolocation compliance system that helps you handle these technicalities? Locance offers a tailored, managed system model that takes care of ruleset implementation and monitoring for you. Contact us today to learn more. Visit Locance.com ↗
